

LAUTARO VALENTINI

Frontend Developer — React.js / Next.js

Córdoba, Argentina | lautivalentini10@gmail.com | linkedin.com/in/lautivalentini

PROFESSIONAL SUMMARY

Frontend Developer with 5+ years building digital products with React.js, Next.js, and TypeScript. Skilled at delivering scalable, maintainable, user-centric web applications and partnering with product teams to turn business requirements into high-impact solutions.

TECHNICAL SKILLS

- Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Reactstrap, Shadcn/UI
- Backend & Data (frontend integration support): Node.js, Express.js, REST APIs, MongoDB
- DevOps & Cloud: Git, CI/CD, monitoring and logging, AWS cloud infrastructure

PROFESSIONAL EXPERIENCE

RHT — Feb 2026 – Jul 2026

Frontend Developer

Santander Consumer Project

- Built frontend applications with Next.js, React, and TypeScript, driving project setup and initialization from the ground up.
- Developed a reusable, highly customizable component library, boosting visual consistency and cutting development time across teams.
- Delivered dynamic interfaces for configurable, backoffice-managed workflows.
- Rolled out client-side tracing, monitoring, and logging to strengthen observability and speed up error diagnosis.
- Partnered with backend and product teams to ship scalable, maintainable features.

digi (Y Combinator W22 | Start Path) — Sep 2021 – Feb 2026

Fullstack Developer

FinTech

- Designed and built web applications with React.js, Next.js, and Node.js.
- Delivered responsive interfaces with a focus on user experience, accessibility, and performance.
- Drove the design of backoffice systems and complex workflows for product administration.
- Integrated FaceTec for identity validation via facial recognition and document verification.
- Supported deployments, monitoring, and application maintenance through CI/CD pipelines on AWS.

Just BrainIt — May 2021 – Sep 2021

Fullstack Developer

HealthTech

- Built web interfaces with React, consuming REST APIs developed with Node.js and Express.
- Contributed to the design of a voice-based health assistant powered by Amazon Polly.
- Delivered new features and drove user experience improvements.
